Summary

As a Sr. Director of Engineering with over 20 years of experience, I have consistently driven large-scale technology initiatives across the finance and SaaS industries. I specialize in building and leading high-performing global teams, delivering complex solutions, and spearheading digital transformation programs aligned with strategic business goals.

I bring deep expertise in product engineering, enterprise and solution architecture, AI/ML integration, and blockchain and digital asset management. I have successfully led cloud enablement, migration, and integration projects, and championed Agile and Lean methodologies to enhance product delivery and operational efficiency.

My focus centers on driving system design, enterprise architecture, and scalable solution development, ensuring alignment with business objectives while fostering innovation, stakeholder engagement, and engineering excellence.

Key Expert Areas:

- Product Engineering
- Enterprise & Solution Architecture
- AI/ML Architecture & Integration
- Blockchain & Digital Asset Management
- Digital Transformation
- Cloud Enablement, Migration, and Integration
- Agile & Lean Methodologies
- Project & Product Management
- Stakeholder Management

Throughout my career, I have taken a hands-on leadership approach, combining strategic vision with execution excellence to deliver innovative technology solutions across global market
